301 Intent (Amended 8/11/09)

To provide areas for a wide range of farming, ranching, or tree farming activities and the preservation of such land for its open rural character providing a physical and visual separation between urban centers.

Urban development within this district is strongly discouraged. Agricultural land use can be an efficient means of conserving natural resources, constituting an important physical, environmental, social, aesthetic, and economic asset to both the urban and rural residents of the County. Expansion of urban development into rural areas is a matter of public concern because of the potential of unnecessary increases in service costs, conflicts between agricultural and urban activities, and the loss of open space and the natural landscape. Development consideration may be given where it would serve to preserve agricultural land or open space, and promote a design that is sensitive to the natural land features in accordance with the intent of the Douglas County Comprehensive Master Plan, as amended.

The A-1 zone district is characterized by large-acreage farms, ranches, open areas, farm houses, units for agricultural workers and their families, and other uses allowed which enhance and promote the openness and general rural nature characteristic of the County. Development or use of land in this district is permitted only in accordance with the provisions herein. Land disturbance activities may require permit(s).

401 Intent (Amended 8/11/09)

To provide areas for large-lot residential uses with limited farming, ranching, or tree farming activities and the preservation of such land as open rural area. The density range is from one dwelling per 34.9 acres to one (1) dwelling per 10 acres.

Urban development within this district is strongly discouraged. Expansion of urban development into rural areas is a matter of public concern because of the potential of unnecessary increases in service costs, conflicts between agricultural and urban activities, and the loss of open space and the natural landscape. Large residential sites with limited agricultural uses may be appropriate when located outside the highway corridor viewsheds depicted on the Douglas County Open Lands Opportunity Map and when adjacent to residential development of similar or greater density. Development consideration may be given where it would serve to preserve agricultural land or open space, and promote a design that is sensitive to the natural land features in accordance with the intent of the Douglas County Comprehensive Master Plan, as amended.

The LRR zone district is characterized by residential sites with limited agricultural uses and open areas, which enhance and promote the openness and general rural character of the County. 501 Intent (Amended 8/11/09)

To provide areas for large-lot residential homesites, on land that has minimal farming or ranching value, that create country living in a rural atmosphere while preserving the vegetation, significant geological features, wildlife habitat/corridors, views and privacy, and provide an appropriate transition from urban development to agricultural areas. The density range is from one dwelling per 9.9 acres to one dwelling per 5 acres.

Expansion of urban development into rural areas is a matter of public concern because of the potential of unnecessary increases in service costs, conflicts between agricultural and urban activities, and the loss of open space and the natural landscape. Large-lot residential homesites may be appropriate when located outside the highway corridor viewsheds, depicted on the Douglas County Open Lands Opportunity Map, and when adjacent to residential development of similar or greater density. 601 Intent (Amended 8/11/09)

To provide areas for medium low-density residential homesites, on land that has minimal farming or ranching value, that create country living in a rural atmosphere while preserving the vegetation, significant geological features, wildlife habitat/corridors, views and privacy, and provide an appropriate transition from urban development to large-lot residential or agricultural areas. The density range is from one dwelling per 4.9 acres to one dwelling per 2.5 acres. Adequate facilities, such as roads, water and sanitation, fire protection, emergency service, and public utilities shall be available to serve these areas.

Expansion of urban development into rural areas is a matter of public concern because of the potential of unnecessary increases in service costs, conflicts between agricultural and urban activities, and the loss of open space and the natural landscape. Medium low-density residential homesites may be appropriate when located outside the highway corridor viewsheds, depicted on the Douglas County Open Lands Opportunity Map, and when adjacent to residential development of similar or greater density. Development consideration may be given where it would serve to preserve agricultural land or open space, and promote a design that is sensitive to the natural land features in accordance with the intent of the Douglas County Comprehensive Master Plan, as amended.

Development within this district should provide road connections, between developments, that provide adequate response time for sheriff/fire protection and medical support, and more efficient service delivery such as school busing.

The ER zone district is characterized by residential homesites and other accessory uses which enhance the basic elements of a balanced residential area, such as, schools, parks, neighborhood recreational facilities, and open space. Development or use of land in this district is permitted only in accordance with the provisions herein. Land disturbance activities may require permit(s).

1401B Intent

To provide for small-scale retail, restaurant, and business uses in balance with residential and civic uses integral to the heart of the community, providing services and employment opportunities that are conveniently and efficiently located to serve residents and visitors, reduce unnecessary commuting, protect air quality, and facilitate the cost-effective provision of services. Adequate facilities, such as roads, water and sanitation, fire protection, emergency services, and public utilities shall be available to serve the development. Growth should occur in a phased and contiguous manner to avoid the costly premature extension of basic infrastructure.

Development within this District is encouraged in compact configurations with active street frontages that provide windows and other features so as to engage the public along the street and avoid blank, windowless walls without architectural detailing. Structures will strongly define the street edge with clear build-to lines. Primary entrances to private and civic buildings will be oriented to the street and directly connected to the public right-of-way. Surface parking lots and structures that lack street-level interest will be hidden from direct public view or lined with active uses. Development should be located so as to minimize conflicts with agricultural uses, wildlife habitats and corridors, and environmentally and visually sensitive areas in accordance with the Douglas County Comprehensive Master Plan.

The D District is characterized by businesses, restaurants, and shops mixed with residential and civic buildings. 1401D Intent

To provide areas for a full range of retail business, commercial, services, office, research, warehousing, small product assembly, manufacturing, distribution, and residential uses located to efficiently utilize public investment in infrastructure and to exercise economies of scale. Adequate facilities, such as roads, water and sanitation, fire protection, emergency services, and public utilities shall be available to serve the development. Growth should occur in a phased and contiguous manner to avoid the costly, premature extension of basic infrastructure.

Development within this District shall be designed to provide for such uses on well-landscaped sites such that they can be located in proximity to other business, commercial and residential uses in accordance with the intent of the Douglas County Comprehensive Master Plan. High performance standards are set forth for this District to assure that development is compatible with adjoining land uses.
